In *Critical Theory of Communication*, Christian Fuchs explores how the theories of five key thinkers from the Frankfurt School – Georg Lukacs, Theodor Adorno, Herbert Marcuse, Axel Honneth and Jürgen Habermas – can contribute to a critical understanding of contemporary media. While the book succeeds in underlining the need to continue re-examining the vital contributions of these theorists, it does not always fully convince of their relevance to more specific aspects of the digital age, argues Adam Hodgkin.

**Critical Theory of Communication: New Readings of Lukacs, Adorno, Marcuse, Honneth and Habermas in the Age of the Internet** Christian Fuchs. University of Westminster Press, 2016.

In *Critical Theory of Communication*, Christian Fuchs revisits and engages the cultural, communication and media theories of Georg Lukacs, Theodor Adorno, Herbert Marcuse, Axel Honneth, Jürgen Habermas and some lesser figures from the Frankfurt School. He also gives attention to other (usually sympathetic) thinkers who are not normally regarded as belonging to this strand of Marxist thought, for example, Raymond Williams, Gaston Bachelard and Leo Volkmann. Fuchs's aim is to introduce these scholars to demonstrate that their theoretical positions have current applicability to contemporary understandings of the internet, digital culture and, most particularly, social media.

The two most important theoretical poles in Fuchs's exposition are Lukacs and Marcuse, and behind them the foundational thinkers for the critical theory approach, Karl Marx and Hegel, with Friedrich Nietzsche and Martin Heidegger lurking off-stage. There is a clear challenge for Fuchs's project: none of these thinkers could in any way have understood the ways in which digital technology would become such a transformative and globalised condition of contemporary society. Even Habermas, who has given a central role to communication, the public sphere and rational action in an information world, published his most important works before the web was invented, long before we discovered trolling, cyber-bullying, 'liking' and phishing. So one immediate challenge for Fuchs's approach is the need for a strong effort of imaginative imagination if we are to retrace Lukacs's convoluted Hegelian apparatus on the current manifestations of popular culture.

Fuchs is particularly keen to draw the reader's attention to Lukacs's last work, a magnum opus entitled *Ontology of*
